EDUCATION

University of Tennessee, Knoxville
Bachelor of Science in Computer Science
Cumulative GPA: 3.81, *magna cum laude*

Graduated December 2025

TECHNICAL SKILLS

Areas	Full-Stack Web Development, Frontend Development, Systems Programming
Languages	C/C++, Rust, C#, Python, JavaScript/TypeScript, HTML, CSS
Frameworks & Libraries	Next.js, React
Databases	PostgreSQL, SQL
Systems & Tools	Unix, Linux, Git, GitHub, Node.js, RESTful APIs
Practices	Agile, debugging & troubleshooting, unit testing

PROJECTS

Word Ladder Website [\[Live Demo\]](#) August 2026 – September 2026

Personal Project | *React, TypeScript, Vite, Vercel*

- Developed a mobile-first word ladder game in React with custom game board and keyboard components.
- Designing the application for future integration with Discord's Embedded App SDK.

PokePrep — Pokemon Draft League Helper 2026 – Present

Personal Project | *React, TypeScript, Vite, Node.js, Express, PokeAPI*

- Building a full-stack draft league helper featuring type matchups, speed tiers, and damage calculations.
- Designing a Node.js/Express backend on Railway serving a Vercel-hosted frontend.

Senior Design — U.S. Candidate Insights Web App Aug 2024 – May 2025

UTK Group Project | *TypeScript, Next.js, PostgreSQL* | github.com/Strategy-Gamer/candidate-insight

- Led front-end development for a web app aggregating policy positions for U.S. political candidates; collaborated with backend developers to integrate a PostgreSQL interface.
- Built dynamic, component-based UIs in Next.js and wrote unit tests to ensure smooth backend integration.

Assembler & Stack-Based Virtual Machine Mar 2025 – May 2025

UTK Group Project | *C#, Rust*

- Designed a stack-based VM (similar to JVM/.NET CLR) with x87 FPU-inspired floating-point operations.
- Developed a two-pass toolchain: C# assembler for encoding and Rust VM for parsing and executing custom bytecode.

Unix Shell Apr 2024

UTK Project | *C*

- Built a Unix shell in C supporting multi-line command parsing, pipelines, and I/O redirection using `fork()`, `execvp()`, and `dup2()`.
- Handled edge cases including zombie processes, file descriptor leaks, and background execution.

WORK EXPERIENCE

Goodwill Industries-Knoxville June 2026 – Present

Sales/Production Associate *Knoxville, TN*

- Manage donation intake, process and price hardline inventory for the sales floor.
- Assist customers on the sales floor and donation door as needed.
